Deloitte Experience
Previous Project: TN Child Support Testing Team
Industry: Health Care**; Sector:** Public Sector
Offering Portfolio: Core Business Operations
Role: Tester**; 1 Year**
Client: State of Tennessee

The Child Support Application provides services that promote parental responsibility to meet the financial needs of children and their families. Child support is a monthly payment, defined by a court, which the non-custodial parent is legally required to pay to the custodial parent. A child support order determines how much the other parent will pay and includes important information like the payment structure and provisions for the child's health care coverage.

Role:

- Involved in evaluating the legacy system developed on Main Frames Technology and prepare the Functional Specifications documents that help the Design and Development Teams to review and design the new application being developed on Java .
- Creation of Test Scenarios and Test Cases based on the Requirements and ensuring all the functions of the Legacy application were covered in the modernized application
- Performing System Testing, Defect Retesting and Regression testing, smoke and sanity testing
- Monitoring test execution and making sure that the execution is completed within the deadlines with good quality
- Involved in all the different phases of testing such as Test Plan and Test Case Design, Test case execution - Execution of the test case manually, Defect monitoring and bug triaging with the developers based on the priority and severity.
- Understanding of QA processes and test methodologies.
- Involved in all the different phases of testing such as Requirement analysis, Test Plan and Test Case Design, Test case execution - Execution of the test case manually, Defect monitoring and bug triaging with the developers based on the priority and severity.
- Appreciated by Leadership and received reward for impactful work.
- Designed & Executed Test Scenarios and Test cases.
